

PAD (Portable Application Description) allows software authors to provide product descriptions and specifications to online sources using a standard data format. PAD allows webmasters and program librarians to automate program listings. Each PAD archive is a data set that is used to disseminate program information to anyone interested in the software product. Product descriptions, such as those that follow, vary in length from 45 characters to 2000 characters and are a portion of that data set. Multiple archives, highlighting various features, may be maintained. These descriptions were developed for a professional photo previewing, converting, and batch processing image conversion utility.

<Char_Desc_45>Right-click photo files to preview & convert!</Char_Desc_45>

<Char_Desc_80>Preview & convert photo files from Explorer! Simply right-click the file name.</Char_Desc_80>

<Char_Desc_250>ImageConverter Plus adds the convenience of right-click photo previewing and conversion to Explorer. Large thumbnail views. Instantly convert image files to .jpg, .tif, .psd, .pdf, .eps, or .png formats without opening ICP or the image file!</Char_Desc_250>

<Char_Desc_450>ImageConverter Plus is a professional image converter that adds photo preview and conversion capabilities to Windows Explorer. Simply right-click a file name to view a large thumbnail image and select a final format. Choose one of ICP's built-in conversions to .jpg, .tif, .psd, .pdf, .eps, or .png formats or access your own scripted conversion operations. All from Explorer! So easy, yet so powerful. Amateurs and professionals alike love ICP!</Char_Desc_450>

<Char_Desc_2000>ImageConverter Plus is a professional image converter that adds photo preview and conversion capabilities to Windows Explorer. Simply right-click a file name to view a large thumbnail image and select a final format. Choose one of ICP's built-in conversions from 120+ different graphics formats to .jpg, .tif, .psd, .pdf, .eps, or .png formats or access your own scripted conversion operations. Over 800 variations of original file formats supported, including special purpose and outdated formats. All from Explorer! Or take advantage of our advanced batch and scripted processing. Pick the operations you need; as simple or as complex as you like! Local

network and individual computer file locations, multiple files, folders & subfolders are supported for both original and destination files. Open ImageConverter Plus and access the wide variety of professional operations. With just a mouse click or two, you can crop images; add Blur, Sharpen, Emboss, Water color, Smoothing, Maximum / minimum, Negative, Grayscale, and Sepia effects; mirror (flip) images (flipping), resize, rotate to arbitrary angles; replace colors; increase or decrease image (canvas) size without scaling your original image; and apply color profiles, watermarks, and watermark images. Apply a single operation or multiple processes to individual images or groups of images. Multi-page files? Create single-strip or multi-strip tiff files. Convert an entire multi-page file or specify individual pages, even only, odd only, skip first or last pages. ImageConverter Plus gives you complete control over color depth and resolution. Choose the compression you prefer from CCITT FAX3, CCITT FAX4, CCITT RLE, ZIP, LZW, OLDJPEG, JPEG, PACKBITS. Apply dithering and quantization functions to fine-tune TIFF image quality. Store files to your database. Create E-mail- and fax-ready documents. Prepare image files for OCR conversion to text documents. Clear, concise documentation. So easy to use, amateurs look like pros in no time! So powerful, pros wonder how they got along without it! Amateurs and professionals alike love ICP!</Char_Desc_2000>

<Char_Desc_45>Right-click TIFF files to preview & convert!</Char_Desc_45>

<Char_Desc_80>Preview & convert TIFF files, all variants! Simply right-click the file name.</Char_Desc_80>

<Char_Desc_250>ImageConverter Plus adds the convenience of right-click TIFF file previewing and conversion to Explorer. Large thumbnail

views. Instantly convert TIFF image files, including rare and old variants, without opening ICP or the image file!</Char_Desc_250>
<Char_Desc_450>New life for rare and old files! ImageConverter Plus is a professional image converter. Silently, background-process faxes, scanned documents, outdated and rare images and illustrations to standard, modern TIFF formats. Built-in TIFF-Wang OldJPEG, TIFF-OldJPEG and TIFF-JPEG conversion. Right-click, single image conversions from Explorer or multi-file batch operations from DOS Command Line or *.bat file processing. Professional and home licenses.</Char_Desc_450>

<Char_Desc_2000>ImageConverter Plus is a professional image converter. Optimized for TIFF (one of the most popular and powerful formats) file conversions. Breathe new life into rare and outdated files, including TIFF-Wang OldJPEG, TIFF-OldJPEG and TIFF-JPEG. If Image Converter Plus cannot process your TIFF file, email it to our support service. New formats, old formats that have been modified, and buggy image formats; 99% of the time, we find a way! And, chances are, support for that very TIF format modification (rare or not) will be added to the standard ICP program. Ideal for processing large numbers of images. You specify the source folder, destination folders, and file type. Working silently in the background, ICP scans and converts images in the source folder and all subfolders. Retain or replace original files, your choice! Local network and individual computer file locations, multiple files, folders & subfolders are supported for both original and destination files. Standardize sizes. Batch process a wide variety of professional effects, including flip, rotate, replace color, blur, sharpen, emboss, water color, smoothing, grayscale and sepia. Add water marks or apply color profiles. Prepare and process faxes and e-mail messages. Plus, ICP adds individual file preview and conversion capabilities to Windows Explorer. Simply right-click a file name to view a large thumbnail image and select a final format. Choose one of ICP's built-in conversions from 120+ different graphics formats to .jpg, .tif, .psd, .pdf, .eps, or .png formats or access your own scripted conversion operations. Over 800 variations of original file formats supported, including special purpose and outdated formats. Clear, concise documentation. So powerful, pros wonder how they got along without it! Professional and home licenses available.</Char_Desc_2000>

<Char_Desc_45>Professional TIFF file conversion & save!</Char_Desc_45>

<Char_Desc_80>Preview & convert TIFF files! Color depth, compression, IPTC, Exif Save options.</Char_Desc_80>

<Char_Desc_250>ImageConverter Plus adds the convenience of right-click TIFF file previewing and conversion to Explorer. Instantly convert TIFF images. Specify color depth, compression, single- or multistrip, and byte order. Retain or discard Exif & IPTC metadata.</Char_Desc_250>

<Char_Desc_450>Professional TIFF Save options. ImageConverter Plus is a professional image converter. Silently, background-process faxes, scanned documents, outdated and rare images to standard TIFF formats. Specify color depth, compression, single- or multistrip, and byte order. Retain or discard Exif & IPTC metadata. Right-click, single image conversions from Explorer or multi-file batch operations from DOS Command Line or *.bat file processing.</Char_Desc_450>

<Char_Desc_2000>ImageConverter Plus is a professional image converter. Optimized for TIFF (one of the most popular and powerful formats) file conversions. Ideal for processing large numbers of images. You specify the source folder, destination folders, and file type. Working silently in the background, ICP scans and converts images in the source folder and all subfolders. Retain or replace original files, your choice! Local network and individual computer file locations, multiple files, folders & subfolders are supported for both original and destination files. Standardize sizes. Individual or batch process with a wide variety of professional Save options, including color depth (mono, 4- and 8-bit indexed, 24- and 48-bit RGB, 32- and 64-bit RGBA, 32-bit CMYK), and byte order (big or little endian). Compress or not to suit your needs. Choose from a wide range of compression algorithms, including LZW, CCITT (RLE, RLEW, Fax3 or Fax4) Flate/deflate, PACKBITS, JPEG, JPEG 6+, or JBIG. Retain or discard Exif digital camera and IPTC news service metadata. Select the multipage option that suits your needs: retain the file as is, save as separate or multipage files, or append to an existing multipage file. Plus, ICP adds individual file preview and conversion capabilities to Windows Explorer. Simply right-click a file name to view a large thumbnail image and select a final format. Choose one of ICP's built-in conversions from 120+ different graphics formats to .jpg, .gif, .tif, .psd, .pdf, .eps, or .png formats or access your own scripted conversion operations.
